### MACHINE CLEANER

Machine and metal parts cleaning fluid. Removes grease, oils, carbon deposits, and other production residues.

**SPR 16**

700 ml

### BRAKE CLEANER +

**SPR 01**

A cleaning product for brakes and other elements of the braking system. It efficiently degreases and does not leave any sediments. It removes the brake fluid, oil, grease, dust and other deposits or sediments from pads, linings, shoes and other elements of the braking system. It reduces brake squeaking. It also efficiently cleans all metal surfaces, parts and tools.

500 ml

### TECHNICAL CLEANER

**SPR 02**

A product for efficient cleaning, degreasing and washing. Perfect for cleaning tools, degreasing surfaces prior to coating, removing stains, removing dirt from bodywork, metal, glass and plastic surfaces. Thanks to spray application, the product reaches all areas that cannot be efficiently cleaned using other methods. It evaporates quickly, leaving the surface dry and clean. The spray features a 360° valve, which is functional in all conditions and performs efficiently regardless of the operating position.

500 ml

### PENETRATING AND LUBRICATING RUST REMOVER

**SPR 03**

400 ml

A multi-purpose product for a wide range of applications. It has optimal penetrating and lubricating properties to minimise friction between the interacting elements during assembly. The lubricant comes in spray form, making it easy to reach hard-to-reach places such as pins, nuts, screws, chains, rods, guides, locks, gears, padlocks, etc. It ensures quick and easy dismantling of rusted and jammed connections. Safe to apply on all commonly used metal surfaces. It removes and prevents the accumulation of sediments on electrical contacts. It is a reliable product recommended for use in any workshop and household repairs.

### ADHESIVE REMOVER „MANDARIN”

**SPR 17**

Mandarin Adhesive Remover is a citrus-based cleaning agent, solvent, and biodegradable remover. The product is designed for dissolving and removing adhesives, greases, oils, inks, stickers, and tar, among other things. It contains powerful citrus oil solvents that effectively clean while leaving a pleasant citrus fragrance. It is also excellent for cleaning equipment and glue guns. It does not contain ozone-depleting substances or chlorine compounds.

500 ml

The spray features a 360° valve, which is functional in all conditions and performs efficiently regardless of the operating position.

A pack of X pieces

### UNIVERSAL LUBRICANT

SPR 04

A multi-purpose grease for wide range of applications. It has optimal penetrating and lubricating properties to minimise friction between the interacting elements during assembly. The lubricant comes in spray form, making it easy to reach hard-to-reach places such as pins, nuts, screws, chains, rods, guides, locks, gears, padlocks, etc. It ensures quick and easy dismantling of rusted and jammed connections. Safe to apply on all commonly used metal surfaces. It removes and prevents the accumulation of sediments on electrical contacts. It is a reliable product recommended for use in any workshop and household repairs.

400 ml

### SILICONE GREASE

SPR 07

Professional silicone grease for the maintenance of rubber and plastic elements, as well as for the lubrication of precision mechanisms. It efficiently protects rubber and plastic elements against sticking and breaking due to aging, and against oxidation. Indispensable for the maintenance of precision mechanisms such as locks, hinges, guides, bolts, gears, V-belts. It efficiently eliminates squeaking and creaking of interacting elements.

400 ml

### WHITE GREASE

SPR 05

The grease is intended for the lubrication of hinges, slide bearings, chains and other moving or sliding parts. It easily reaches hard-to-reach areas. Resistant to water, including sea water, thus recommended for use on sailboats, motorboats and ships.

400 ml

### CERAMIC GREASE

SPR 08

Masterio high-temperature ceramic grease is intended for high mechanical and thermal load bearing elements. It easily reaches difficult to access areas. It can be used in braking systems equipped with: ABS, ASR, and ESP, as well as in the assembly of injectors, manifolds, heads, exhaust systems and other components exposed to high temperatures. It is also recommended for lubricating screws during assembly, effectively preventing seizing and sticking during use, e.g. when mounting wheels with aluminium rims. Application temperature: from -30 do 1200°C.

400 ml

### SYNTHETIC GREASE FOR CHAINS

SPR 06

A grease intended for the lubrication of chains in motorcycles, bicycles, forklifts, cranes, machines, semi-open gears, rollers, guides, slide rails, steel cables, cords and links. It ensures very good protection against rust and reduces wear on the surfaces of the friction elements. It is characterised with good adhesion and ability to remove moisture from metal surfaces. Operating temperature range from -40 to 120°C.

500 ml

### DRILLING AND THREADING OIL

SPR 09

High-performance, high-quality oil for use in metal machining processes such as drilling, threading, cutting, grinding, sawing and stamping.

This product perfectly cools and lubricates at high cutting speeds, which extends tool life, improves machining parameters, prevents chips from sticking and lowers the temperature. The grease is resistant to chemicals and exhibits excellent thermal conductivity. An ultra-thin layer ensures long-lasting lubrication and protection.

400 ml

### COPPER GREASE +

SPR 10

Masterio high-temperature copper grease is intended for the protection of slide bearings and metal elements operating at high temperatures and exposed to water. It is mostly recommended for use in motor vehicles to prevent corrosion and seizing of screws and bolts in brake and exhaust systems.

The grease contains copper powder, which improves electrical and thermal conductivity, so it can be used in glow plugs and battery clamps assembly (except for aluminium ones).

Application temperature: from -20 do 650°C. Caution! The product is not intended for brakes equipped with ABS and aluminium surfaces.

400 ml

### GASKET CLEANER

SPR 13

It removes the residues of the permanent sealings, e.g. under the cylinder head, by the exhaust. It can be used on objects made of metal, wood, glass, ceramics, polyethylene, and polypropylene. The addition of an anti-corrosion agent prevents raw metal corrosion. Quick and easy application.

400 ml

### PTFE GREASE

SPR 11

PTFE grease perfectly protects the moving mechanical system elements against friction, including chains, gears, rollers, sliding rails, hinges, locks, etc.

It protects metal, plastic and rubber elements against corrosion, moisture, many aggressive chemicals and dirt.

300 ml

### ISOPROPANOL

SPR 14

A universal agent for cleaning sensitive electronic, electrical, and optical parts, as well as audio and video devices. It cleans and degreases photographic camera lenses, night vision lenses, binoculars, telescopes, glasses, magnifying glasses, CD/DVD/BD laser readers. It removes dirt, oil and grease, leaving no sediments.

500 ml

### GLASS FOAM

SPR 12

A unique, highly effective product for cleaning all glass surfaces. The special formula removes dust, grease and dirt with no need for long-time scrubbing, leaving the cleaned surface clean, shiny and scratch-free. The agent quickly and efficiently removes dirt from windows, car windscreens, countertops, mirrors, display cases and other glass elements.

500 ml

### OK 20 SEPARATION FLUID

SPR 15

A separation fluid for furniture industry used in edge banding machines, on pressure rollers. It is applied directly on the pressure roller or board edge during edge processing.

After the fluid evaporates, it leaves a protective layer, which prevents sticking of glue to the rollers and board edge soling. When applied directly on the edge, the product forms a protective layer, which prevents scratching. When applied on the processing tools, e.g. mills or drills, it prevents the adhesion of dirt and facilitates its removal.

500 ml
